บริษัท บัค โปรโมชัน แอนด์ เซอร์วิส จำกัด

The Cochrane Collaboration

**คือ องค์การอิสระระหว่างประเทศที่ไม่ได้
แสวงหาผลกำไร ก่อตั้งเมื่อปี 1993 โดยผู้เชี่ยวชาญ
โรคระบาด ชื่อ Archie Cochrane**

**ภารกิจหลัก คือ การปรับปรุงและให้ข้อมูลที่
ถูกต้องเกี่ยวกับผลกระทบด้านสาธารณสุขที่เกิดขึ้น
อย่างรวดเร็วทั่วโลก**

The Cochrane Library

คือที่รวบรวมของฐานข้อมูลที่ประกอบเป็นด้วยข้อมูลและข้อเท็จจริง
คุณภาพสูงและเป็นกลาง ซึ่งเป็นประโยชน์ในการเป็นข้อมูลประกอบการ
ตัดสินใจในการให้บริการรักษาทางการแพทย์ ประกอบด้วยแหล่งข้อมูล ดังนี้

- 1. Cochrane Database of Systematic Reviews (Cochrane Reviews)**
- 2. Other Reviews (Database of Abstracts of Reviews of Effects-DARE)**
- 3. Clinical Trial (The Cochrane Central Register of Controlled Trials CENTRAL)**
- 4. Methods Studies (The Cochrane Methodology Register-CMR)**
- 5. Technology Assessment (Health Technology Assessment Database HTA) Economic Evaluations**
- 6. (NHS Economic Evaluation Database-NHS EED)**

Cochrane Database of Systematic Reviews

(Cochrane Reviews)

เป็นฐานข้อมูล **Systematic Review** ให้ข้อมูลเกี่ยวกับการรักษาโรคหรือปัญหาการดูแลสุขภาพ มีการประเมิน สังเคราะห์ และสรุปเกี่ยวกับประสิทธิภาพออกมาเพื่อให้ผู้อื่นได้ทบทวนผลการศึกษาก่อนๆ ในเรื่องนั้นๆ ได้ แบ่งออกเป็น 2 ส่วนคือ

1.1 Cochrane Review เป็น Systematic Review ฉบับเต็ม

1.2 Cochrane Protocol สำหรับ Review ซึ่งกำลังอยู่ในระหว่างการดำเนินการ ประกอบด้วยความเป็นมาของปัญหา วัตถุประสงค์ และวิธีการศึกษา

Other Reviews

(Database of Abstracts of Reviews of Effects-DARE)

- เป็นฐานข้อมูลที่เป็นบทคัดย่อของบทสรุป **systematic reviews** ร่วมกับคำวิจารณ์โดยทีมของกลุ่ม **DARE**
- ฐานข้อมูลนี้เหมาะสำหรับผู้ใช้ข้อมูลที่มีข้อจำกัดของเวลาและต้องการทราบผลของการรักษา
- มีการประเมินคุณภาพของงานวิจัยและสรุป
- เพิ่มเติมในกรณีที่ไม่มี **systematic review** ใน **Cochrane Library**

Clinical Trial

(The Cochrane Central Register of Controlled Trials-CENTRAL)

- เป็นบรรณานุกรมสิ่งพิมพ์รายงานวิจัยเชิงทดลองทางคลินิก (Clinical Trials) ในสาขาต่างๆ จากแหล่งต่างๆ เช่น MEDLINE, EMBASE และแหล่งอื่นๆ ที่ตีพิมพ์และไม่ตีพิมพ์ไม่มีฉบับเต็มแต่อาจมีเรื่องย่อให้
- ข้อมูลประมาณ 3 ใน 5 ส่วนมาจาก MEDLINE นอกจากนั้นเป็นความร่วมมือของกลุ่ม Cochrane Collaborative Review Group ที่รวบรวมขึ้นมา เป็นประโยชน์มากเพราะรวบรวมงานวิจัยเชิงทดลองทางคลินิกไว้ในแหล่งเดียวกัน

Methods Studies (The Cochrane Methodology Register-CMR)

- เป็นบรรณานุกรมของสิ่งพิมพ์ที่ช่วยผู้ที่ต้องการค้นข้อมูลใหม่ๆ วิธีต่างๆที่ใช้ในการทำ **controlled trials** ระเบียบวิธี **review** งานวิจัยด้านระเบียบวิธีที่กำลังดำเนินอยู่ รวมถึงหนังสือ รายงานการประชุม และบทความวารสารที่เป็นเรื่องของ **systematic reviews** และ **meta-analysis** เป็นการใช้ **handsearching** และค้นจาก **MEDLINE**
- บางครั้งมีเรื่องย่อให้ แต่ไม่มีฉบับเต็ม

Technology Assessment

(Health Technology Assessment Database-HTA)

- **ฐานข้อมูลนี้รวบรวมรายงานที่เป็นการประเมินทาง health technology assessments**
- **ทั้งในด้าน medical, social, ethical and economic implications of health care interventions จากทั่วโลก**
- **วัตถุประสงค์เพื่อพัฒนาคุณภาพและความคุ้มค่าของการดูแลทางการแพทย์**

Economic Evaluations

(NHS Economic Evaluation Database-NHS EED)

- **ฐานข้อมูลเกี่ยวกับ costs และ effects ที่สำคัญในการตัดสินใจในการรักษา**
- **โดยการรวบรวมข้อมูลด้วย**
- **systematically identifying economic evaluations**
- **appraising their quality**
- **highlighting their relative strengths and weaknesses**
- **The database contains over 5,000 abstracts of quality assessed economic evaluations.**

Cochrane in the United States of America by Dr David Tovey & Dr Robert Dellavalle

Joint Colloquium of the Cochrane & Campbell Collaborations

On 18 October 2010, the first joint Colloquium between the Campbell and Cochrane Collaborations opens in Keystone, Colorado, USA. The USA last hosted the Cochrane Collaboration Colloquium and annual meeting in 1998 in Baltimore, Maryland. The Colloquium's return to the USA comes on the heels of President Obama's signing of historic health care reform legislation...

SEARCH TIPS

Tip No. 1:

Boolean operators AND, OR, and NOT can be selected from the pulldown selection boxes or entered directly within the search text boxes. Use parentheses to separate components when entering complex search directly in text box with mixed Boolean operators.

Example: *(colchicine AND liver) AND (fibrosis OR cirrhosis)*

Tip No. 2:

The AND operator is used by default between search terms. The string *brain stem* will match records where both words are included in any order or proximity. Search for exact phrases by enclosing a string in quotation marks.

Example: *"clodronate therapy"* matches that exact term

Tip No. 3:

Search for accented characters (within all fields except Author) by using both the accented and unaccented versions of a term or by using wildcard (multiple: *) or (single: ?) characters.

SEARCH TIPS

Tip No. 1:

Boolean operators AND, OR, and NOT can be selected from the pulldown selection boxes or entered directly within the search text boxes. Use parentheses to separate components when entering complex search directly in text box with mixed Boolean operators.

Example: *(colchicine AND liver) AND (fibrosis OR cirrhosis)*

Tip No. 2:

The AND operator is used by default between search terms. The string *brain stem* will match records where both words are included in any order or proximity. Search for exact phrases by enclosing a string in quotation marks.

Example: *"clodronate therapy"* matches that exact term

Tip No. 3:

Search for accented characters (within all fields except Author) by using both the accented and unaccented versions of a term or by using wildcard (multiple: *) or (single: ?) characters.

SEARCH TIPS

Tip No. 1:

The Search History includes a listing of all Cochrane Library searches used during your current session. New searches can be added directly by using the text box and limiters at top of page. All search options used for an Advanced Search such as Boolean operators (AND, OR and NOT), wildcard characters (*), and nested searches with parentheses can also be used on the Search History page.

Tip No. 2:

On search history page, type field labels to restrict by field - abstract (:ab), author (:au), keywords (:kw), source (:so), title (:ti), publication type (:pt), tables (tb), or DOI (:doi). If no field label is used, "all text" is searched.

Example: *(heart.ti,ab,kw and cardiology:so)*

(heart or atrium).ti,kw,ab

Tip No. 3:

Each search is identified by an order number preceded by a "#" character. You can build a new search in the text box by combining previous searches with Boolean operators.

Example: *(#1 AND #2) OR (#3*
